

B I O O m

*Biomass
a true alternative
to petroleum*

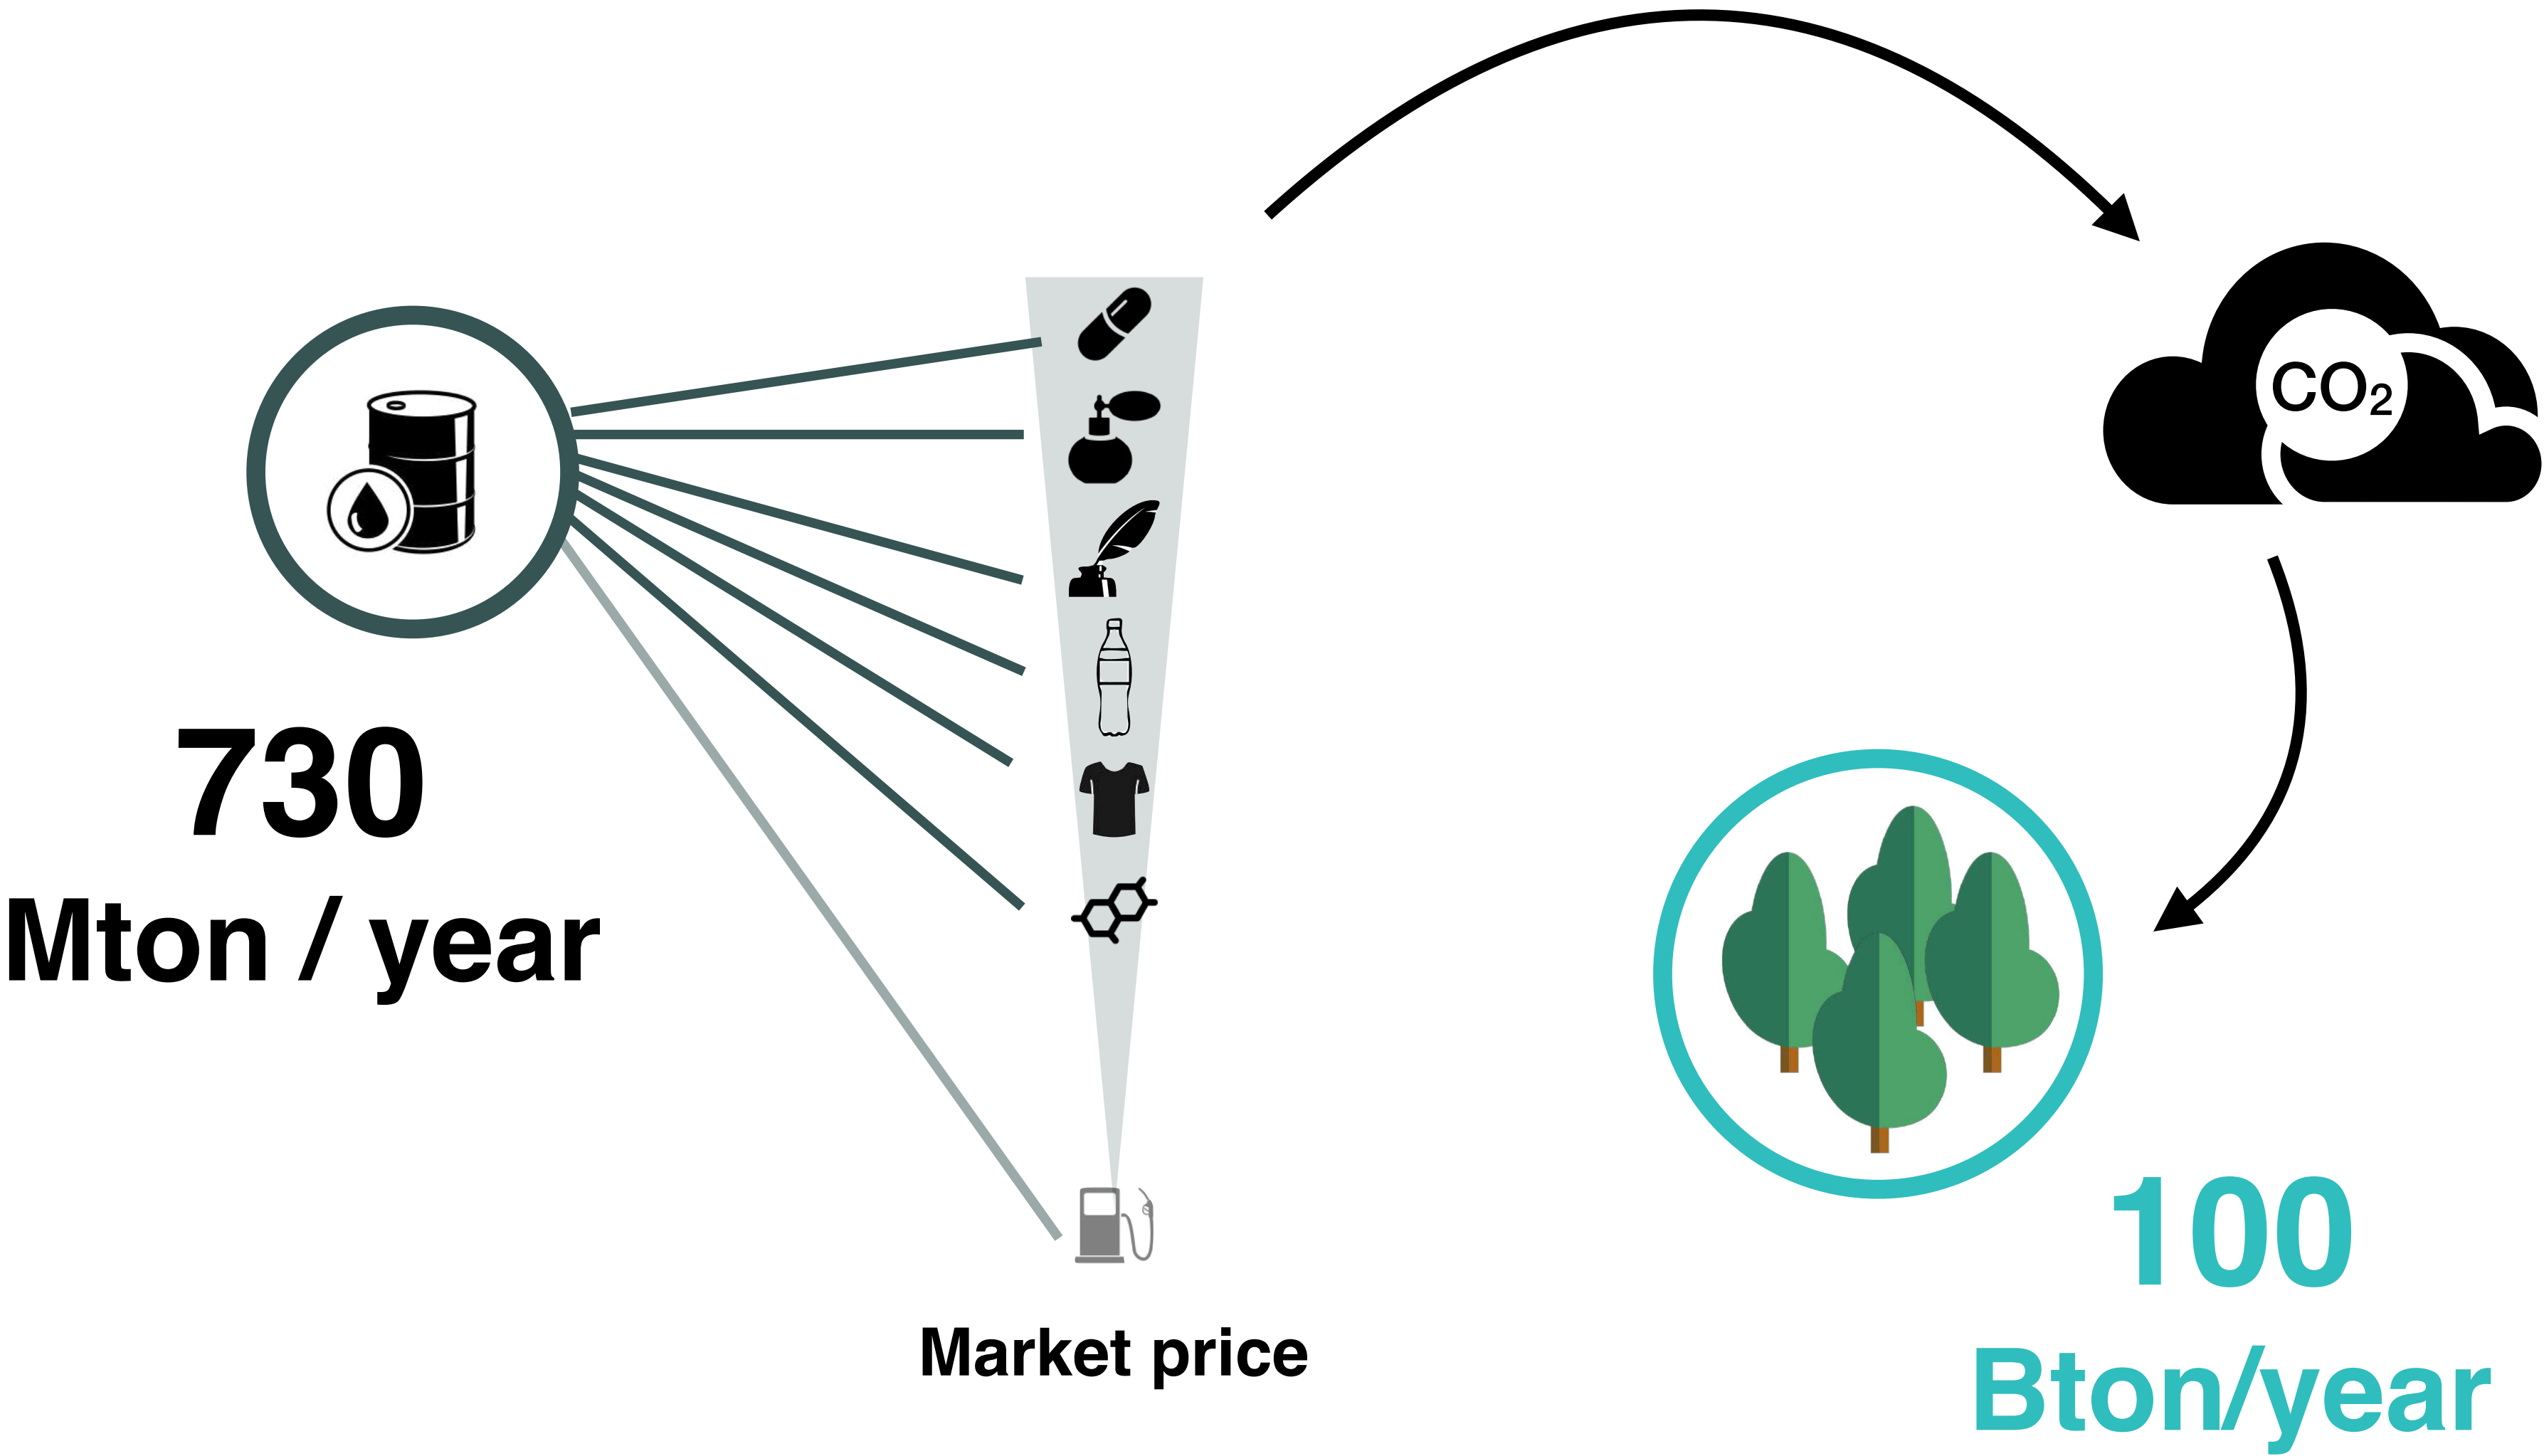

The oil age will end before the world runs out of oil

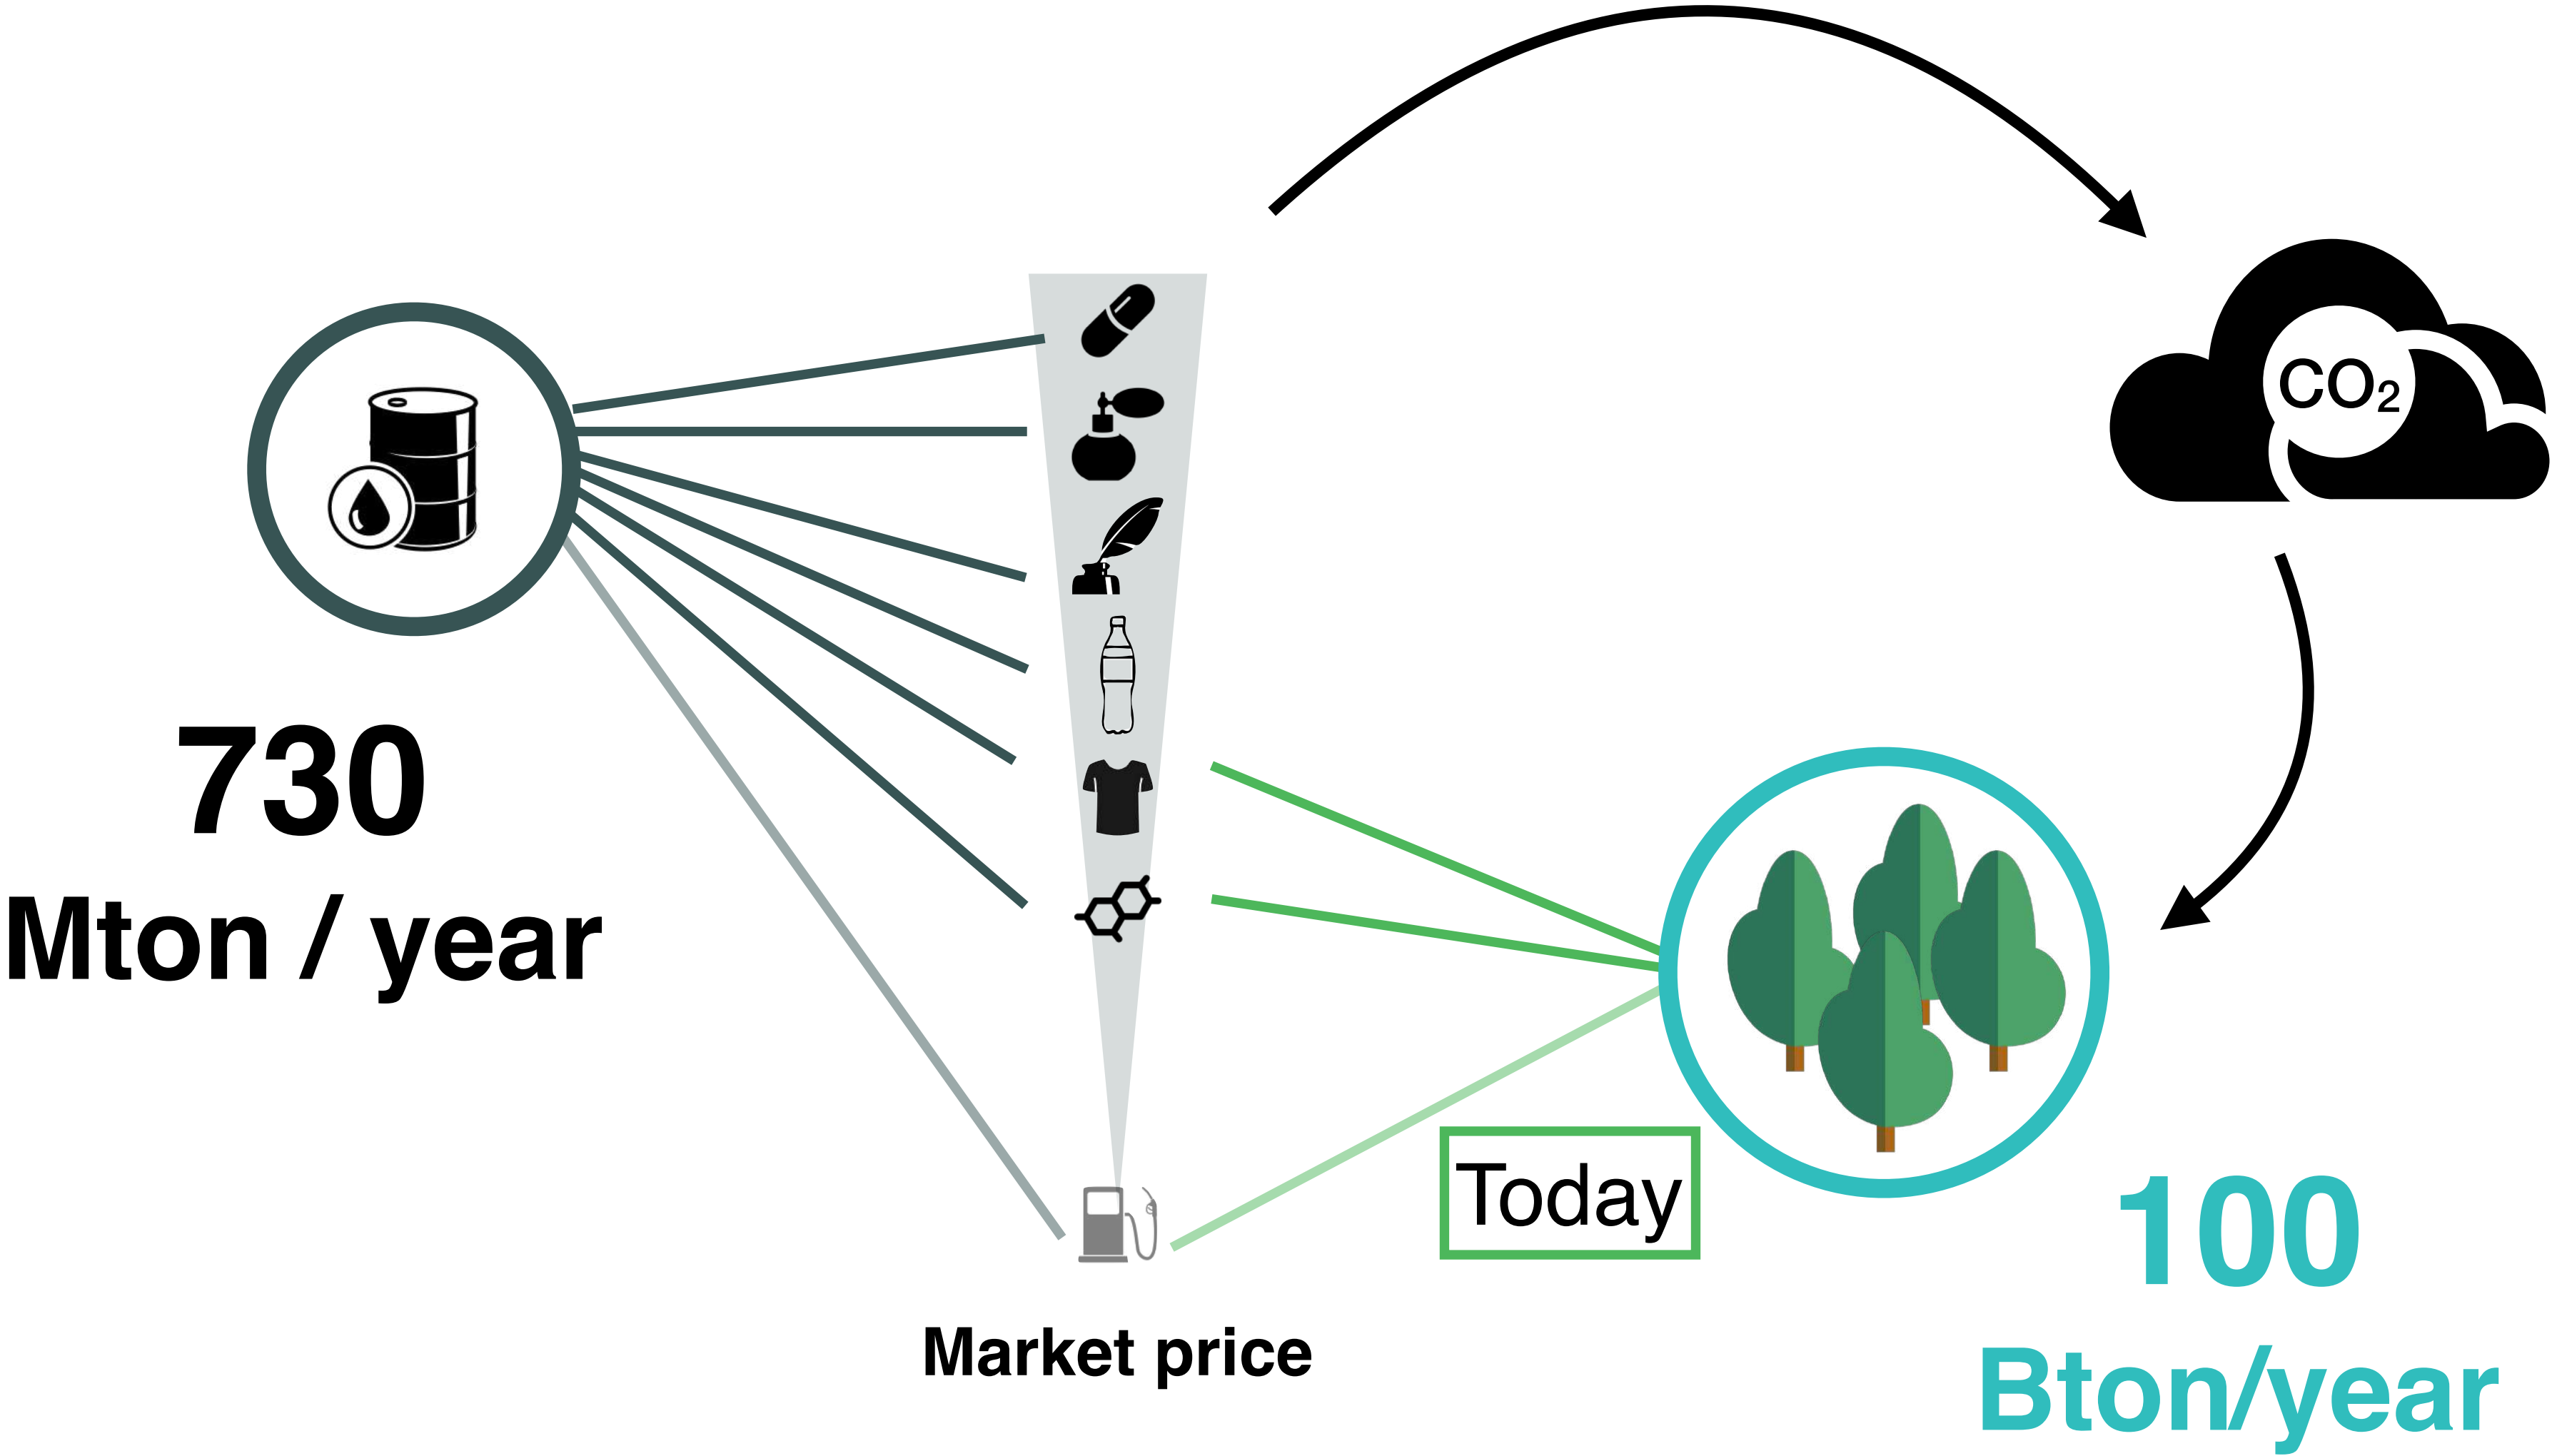

The oil age will end before the world runs out of oil

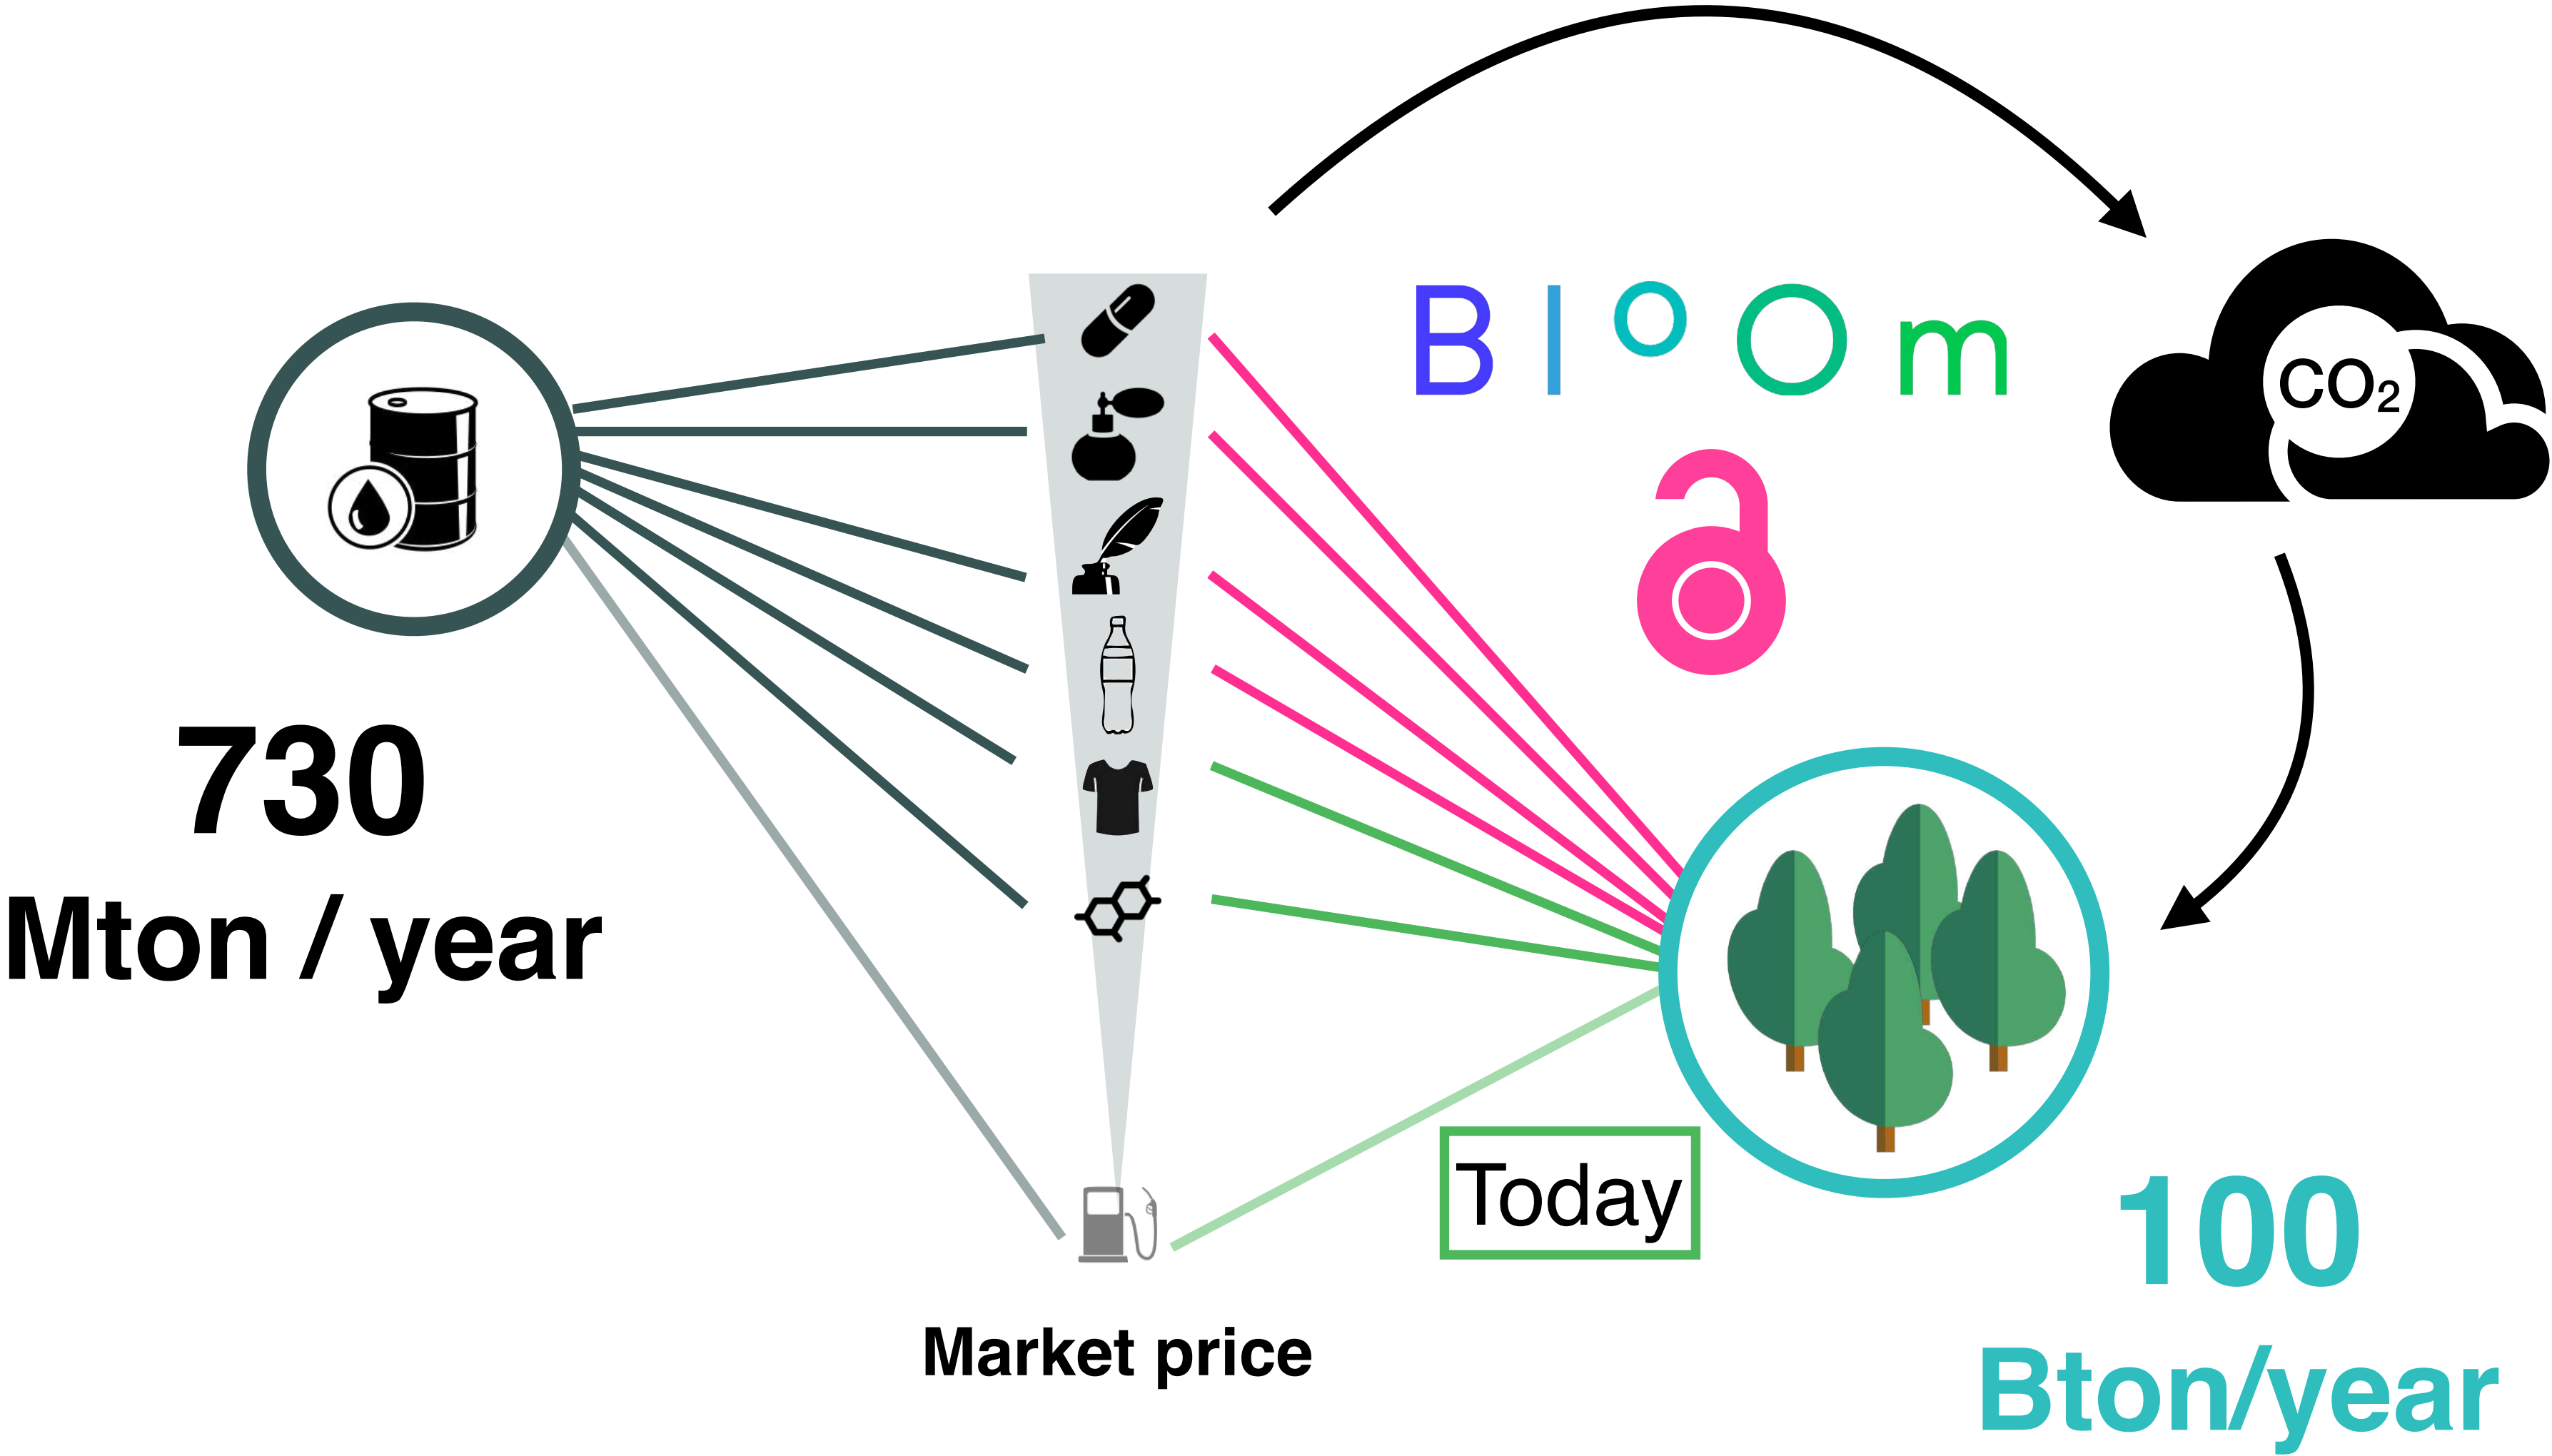

The 2 alternative sustainable carbon sources

The need for cost-competitive and high quality products

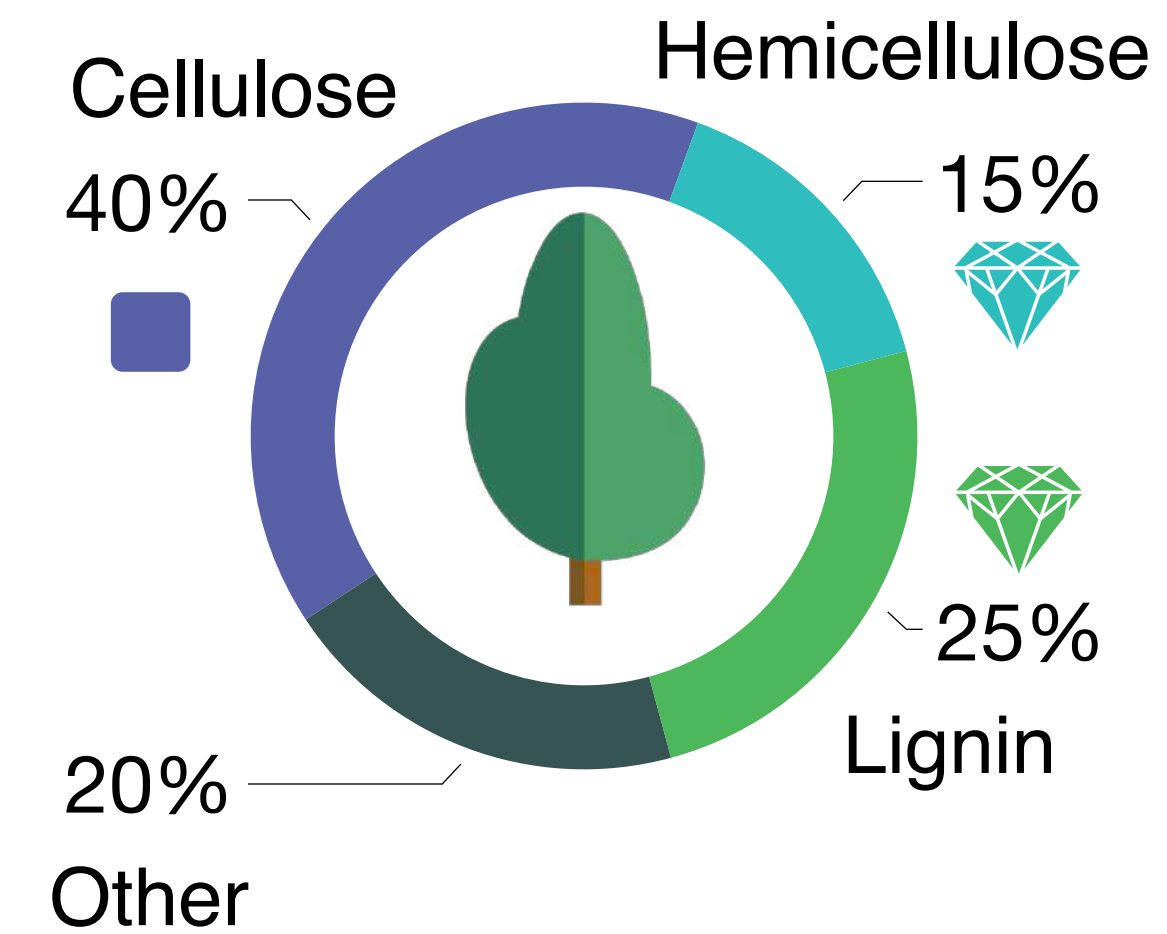

The need for cost-competitive and high quality products

Biomass as a starting material

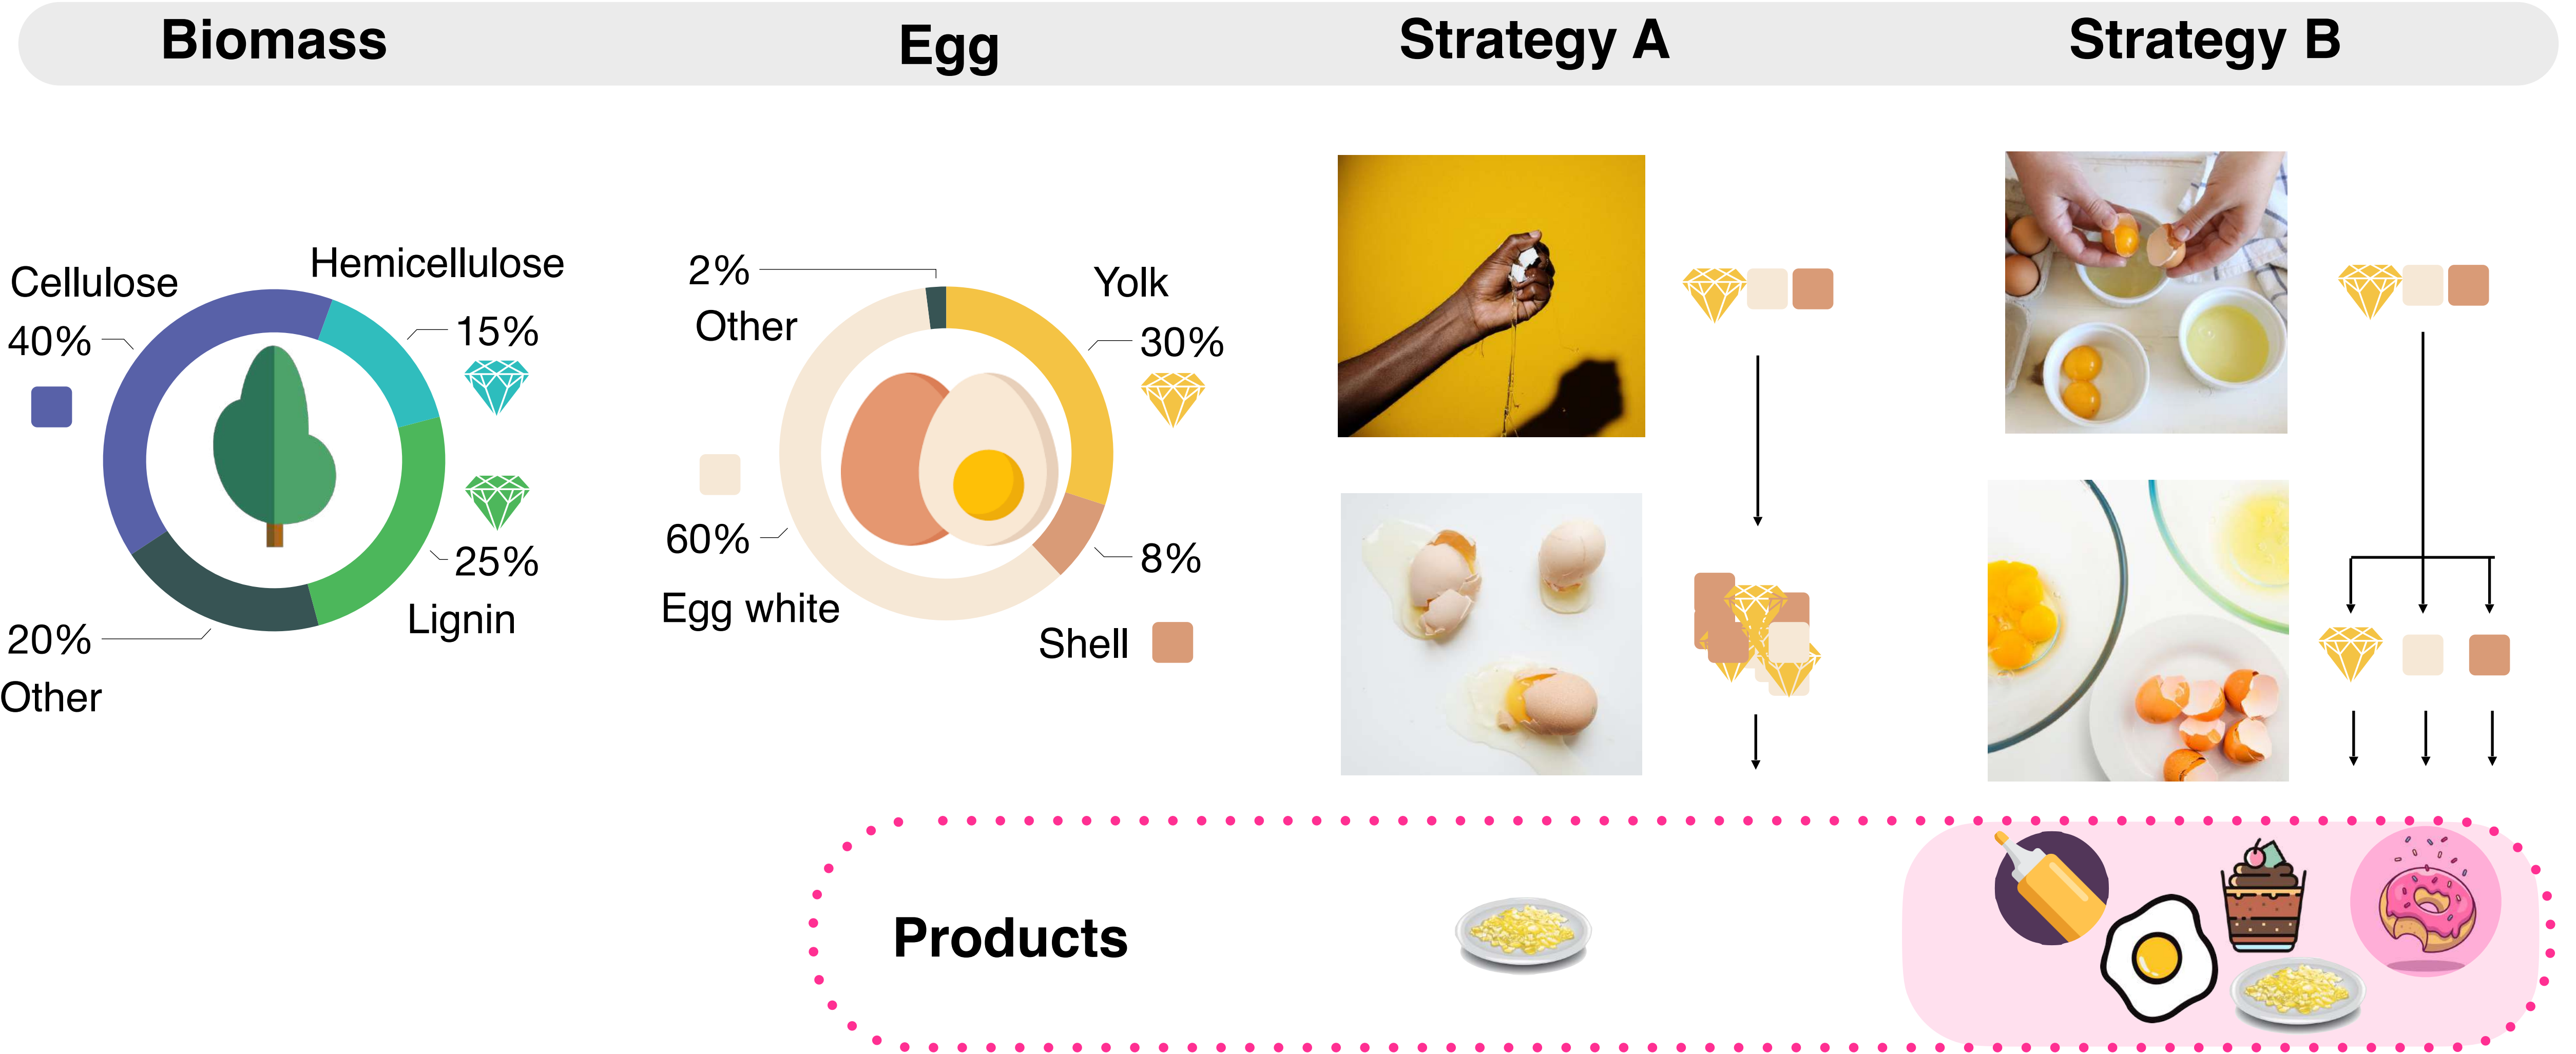

Efficient fractionation for integral valorisation

Biomass

Biomass as a starting material

Efficient fractionation for integral valorisation

The value chain

From biomass to end-user

CONFIDENTIAL

Fragrances and flavours

Ongoing pilot with key players

Bio-based / non-food resource / constant supply

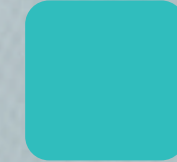

Bio-plastics

Sustainable alternative to PET

Bio-based / biodegradable / recyclable

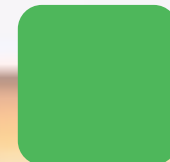

Sampling to brand owners

Up to 90% CO2 equiv. reduction

Polyurethanes

Substitution of petro-derived phenol

Marine fuels

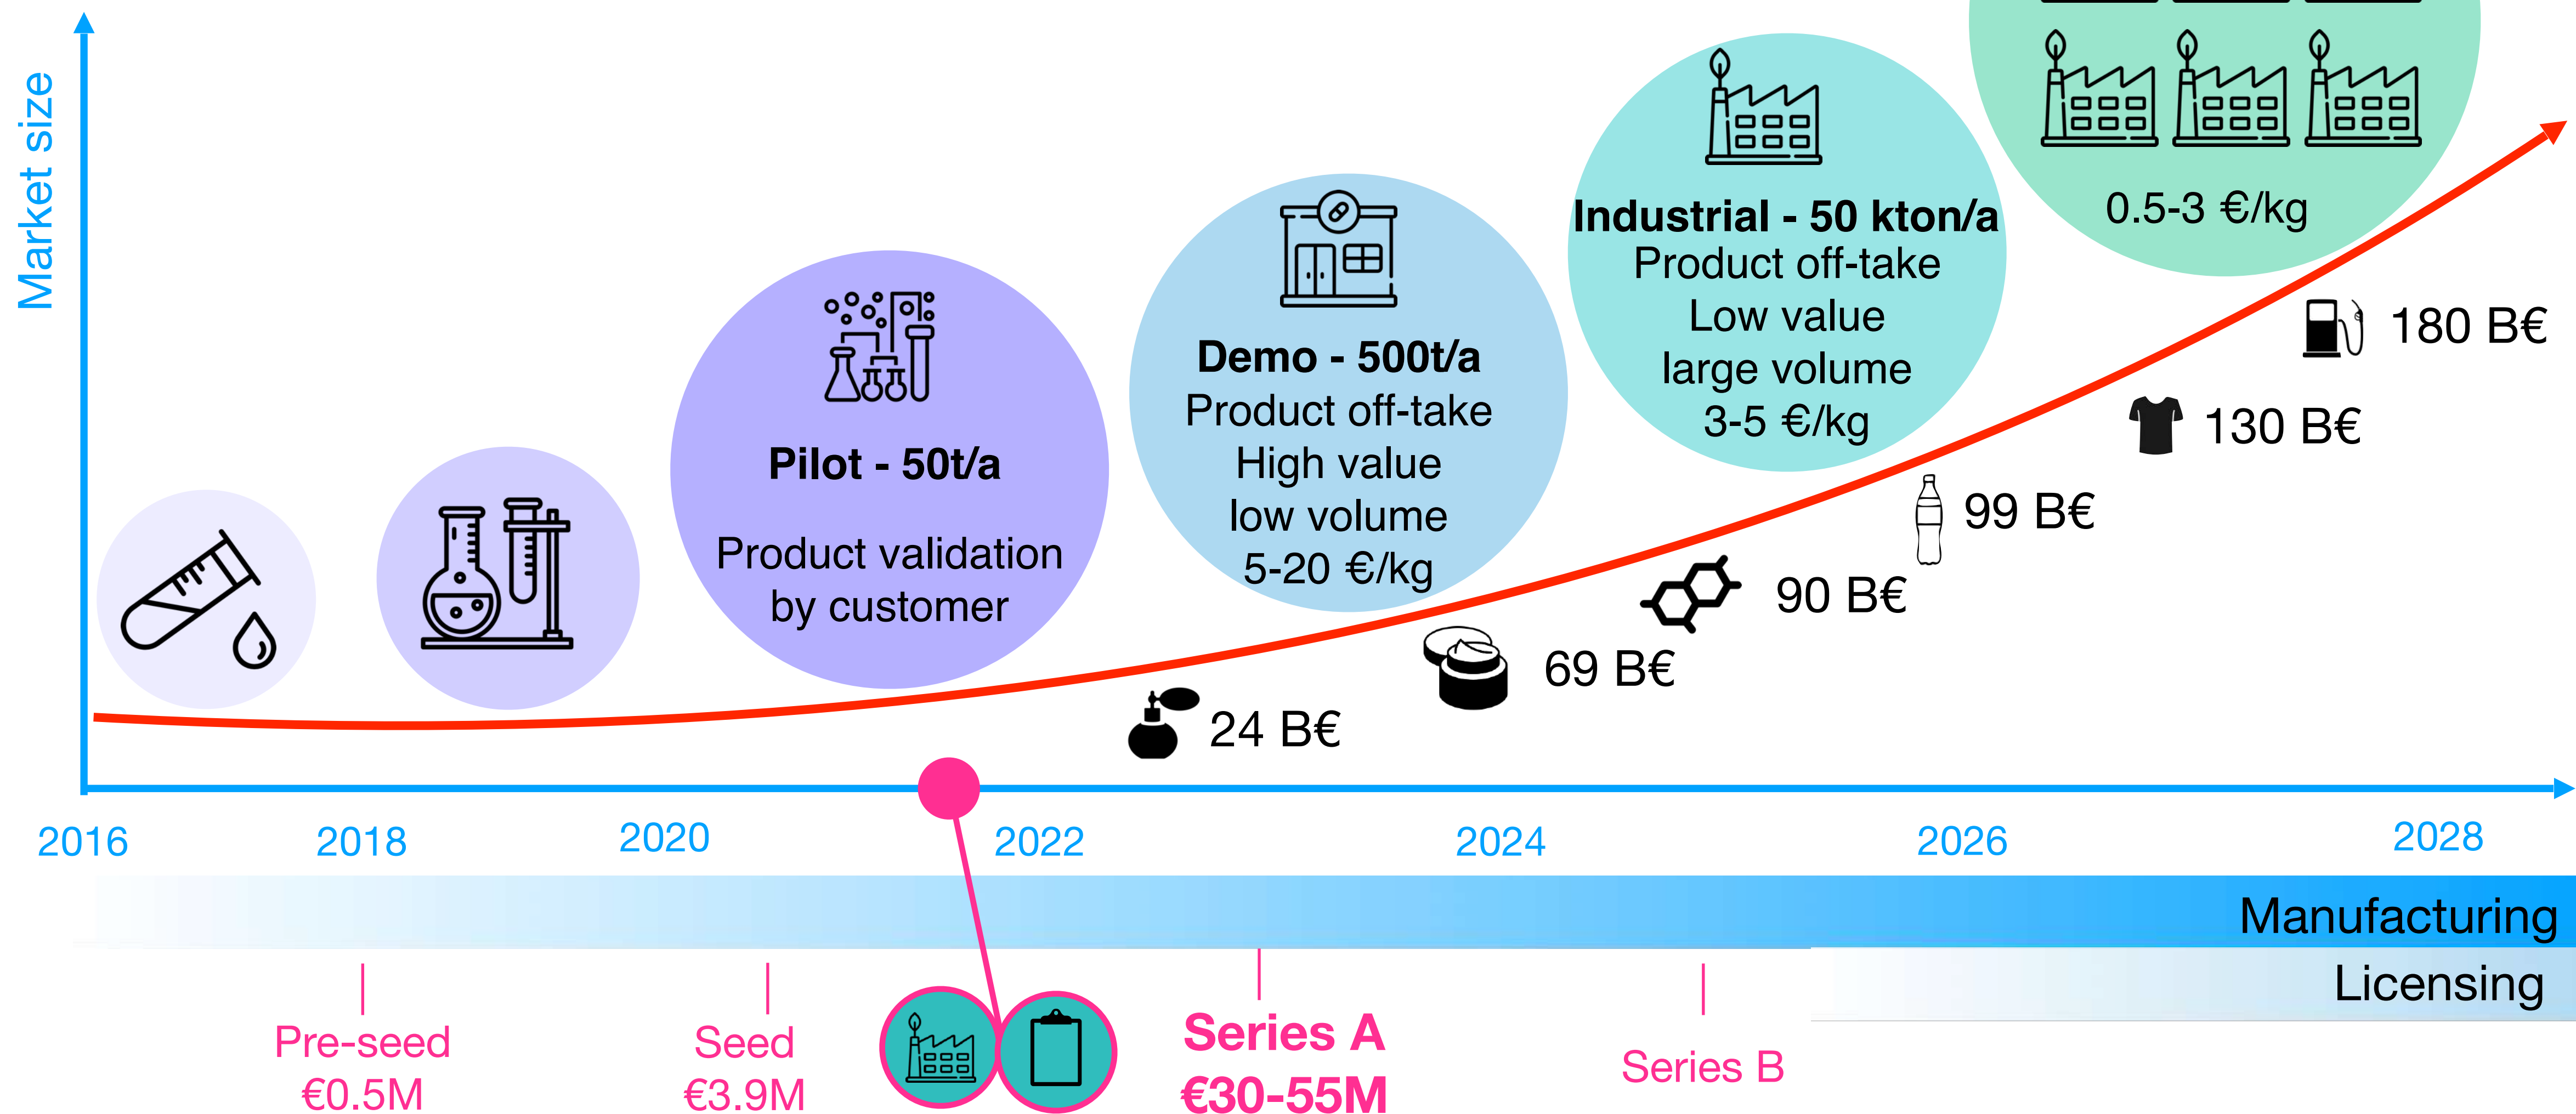

Drop-in Sulfur free bio-genic heavy fuel oil

Ongoing project with cargo companies

Commercialisation pipeline

From niche to mainstream markets

Let's join forces
