Finance and Climate: which investments? which models for financing the transition?

Characters (actors),
Kind of capital

Special role of fin institutions:

To serve client's fin demand

To manage risks (to serve stakeholders demand)

To advise clients in their needs (non-financial)

Goals for Emissions reductions, CO2 utilization and removal

Actual Climate Outcomes

Engineering Procurement Construction

Technologies: performance, disrupt, ..

Finance and Climate: which investments? **which models for financing the transition ?**

Costs = Expenses **NO** Investment **YES**

Stakeholders of the “net-zero” scenario (Governments, NGO’s, companies, fin institutions, ..) should design and develop sustainable **models for financing the transition**

Global cooperation and confidence are needed

Just an example: expert evaluation of the potential of CO2 removal by natural ecosystems and relative cost for one ton CO2

Finance and Climate: which investments? **which models for financing the transition?**

Sberbank's approach

	Outcomes	To develop
